

9-pin bowling

If you do not have bowling pins, anything tall and round that you can stand upright can work (paper towel or toilet paper tubes, round blocks, etc.)

Line up your pins (or other item) in a diamond pattern as shown below

Roll a small ball toward the pins and try to knock down as many as possible. Do this twice (without picking up the pins in between) and count the number of pins. This is your score for that round. Re-set the pins for the next person to take their turn. Keep going until one person hits a certain score, or until you complete a certain number of rounds.
